PDF to TIFF Converter SDK is a powerful desktop utility, it supports to convert multiple PDF documents to various TIFF format with various properties, it is easy to use, to enable to choose the output resolution of the converted files. Thanks for his help, good work Marko

06-Feb-2017 About OakDoc
PDF to TIFF Converter SDK
OakDoc PDF to TIFF Converter
SDK is an application designed to
help users easily convert PDF
files to TIFF images. The
software is suitable for all kind of
users, courtesy of a wizard-like
interface, which makes it easy for

users to browse for the files they want to convert and to set specific options for the output images. Without the need of a third-party application, this utility can convert PDF files and vector graphics to TIFF file formats, while also allowing users to manipulate the resulting images

so as to ensure that they best fit their needs. The tool comes with support for a variety of output paper sizes, and also provides users with the possibility to

09e8f5149f

- Free version supported up to 5 computers in one company.
- The conversion tool limits the maximum number of converted documents to 50.
- Convert up to 50 PDF documents to TIFF images per company ID.
- The

conversion tool supports multiple CPUs. •Select the resolution of TIFF. •Setting conversion options. •Option to create multi-page image file. •Option to create PDF files with custom filenames. •Option to set the encoding. •Option to change display DPI. •Converts text. •Converts vector

graphics and raster images.

- Advanced settings for gamma correction.
- Option to crop the image.
- Option to resize the document.
- Rotate the image

Important Feature: The software comes with a variety of options that are meant to ensure that the quality of the output images is

always up to the mark. In this way, it is possible to choose a specific compression and DPI for the converted images, as well as to set the printing resolution. Furthermore, it is possible to convert a document as many times as required by pressing on the 'Iterations' tab. The support

for vector graphics allows the application to process hundreds of pages in a single file, while the ability to crop an image according to the desired area is very convenient indeed. In addition, the software can rotate the output image and convert text, while the option to create

PDF files with custom filenames is a great convenience indeed. The interface of the utility is very intuitive and easy to use, and thus it is possible for users without technical knowledge to convert PDF to TIFF files without problems. Apart from this, OakDoc PDF to TIFF Converter

SDK Unlimited License is compatible with all major operating systems, while it is also available for 32-bit and 64-bit systems. StaSoft PDF to TIFF Converter SDK is a simple PDF to TIFF Converter software that can convert PDF files to TIFF image files and to process the

resulting images with the help of easy-to-use controls. The software is suitable for all kind of users, courtesy of a wizard-like interface that allows users to browse for the files they want to convert and to set specific options for the output images. Without the need of a third-party

application, this utility can convert PDF files and vector graphics to TIFF image formats, while also allowing users to manipulate the resulting images so as to ensure that they best
