Q: Unable to get checkbox status in a GridView in ASP.net I have a GridView control. Where this GridView gets the data from a SqlDataReader object. The GridView has a checkbox column. But I am unable to get the value of the checkbox for the particular row I check. How can I achieve this? A: The GridView checkbox is bound to the checkbox column so you just need to check for the value of the column. (Which is bound to the row at the time you're fetching the data to bind to the GridView.) if (myDataReader.GetBoolean(columnIndex)) { // Mark the row as checked. } I noticed that the DataTable itself has a Boolean DataColumn property - if it is safe to assign there, you can avoid having to iterate through the table rows and checking the value of each row. DataTable dt = GetData(); dt.Columns[columnIndex].DefaultValue = false; A: You need to use the following code for gridview checkbox column (if you have combo box in the gridview) if (Convert.ToBoolean(Eval("columnName"))) { //do something } You are here Coronavirus: Tourists and pilgrims still coming to India India's new steps to prevent the spread of coronavirus have become apparent with a drop in the number of tourists and pilgrims visiting the country. A number of tour operators in India told The Straits Times that the drop in the number of visitors to India was noticeable from about a week ago, when Prime Minister Narendra Modi announced a lockdown to contain the spread of COVID-19.
